

SUPERIOR *care* THROUGH ADVANCED MEDICAL IMAGING

EXPERT TREATMENT STARTS WITH SPECIALIZED
 DIAGNOSES FROM RADIOLOGY PHYSICIANS

Oncology & Nuclear Medicine

Deals with the use of radioactive substances in research, diagnosis, and treatment.

Musculoskeletal

State of the art imaging of disorders of the bones, joints, and associated soft tissues; includes radiography, CT, ultrasound and MRI.

Neuroradiology

A subspecialty focusing on the diagnosis and characterization of abnormalities of the nervous system, spine, head and neck.

Breast Imaging

A complete array of services including screening and diagnostic mammography, 3D, ultrasound, MRI and biopsies.

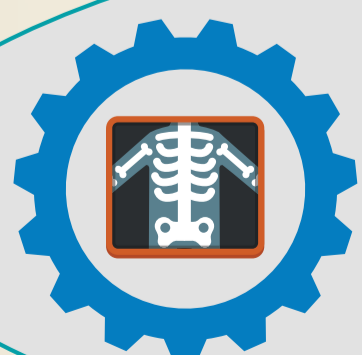

Vascular & Interventional

Providing minimally invasive image-guided diagnosis and treatment of diseases in every organ system.

Cardiothoracic & Body Imaging

Multi-modality body imaging with a heavy emphasis on MRI and CT.

Pediatric Imaging

Medical imaging of children using lower and limited radiation doses and intervention techniques without compromising diagnostic quality.
